Harrison, New York 10528

Re: Municipality Software Applications

Dear Mayor Belmont and Members of the Village Board:

Village Board authorization is requested to purchase the "Municipity" municipal software system.

Municipity software will replace our currently antiquated processing system, providing Town staff with a modern land management network which will allow full integration of all activities related to land development and permitting.

This software will help revolutionize the manner in which the various departments interact, communicate and perform day to day operations. It will facilitate productivity without the need for additional staff and enable a higher quality of workmanship. The departments benefited include: Tax Assessor, Building, Code Enforcement, Public Works, Planning, Zoning and Engineering.

Municipity is utilized in many of the municipalities within the county and also interacts with Westchester County GIS data and metadata.

Village Board authorization is requested to purchase Municipity Software and related hardware at a cost not to exceed \$90,000.00.

Further authorization is requested for the Treasurer to bond funds in an amount not to exceed \$90,000.00 plus bonding costs.

Respectfully submitted

Michael J. Amodeo, P.E.  
Town/Village Engineer

MJA/fmb
